

DIVERSITY SOD BLUE BLEND™

DESCRIPTION

DIVERSITY SOD BLUE BLEND™ is formulated for the professional turfgrass sod producer who services the most demanding professional clientele. DIVERSITY will meet specifications for use on a wide range of jobs; from golf course turf, to performance sports fields, to the most prestigious estate properties. DIVERSITY will fulfill the needs of your professional turf manager customers who are striving for elite Kentucky bluegrass performance. DIVERSITY's formulation includes multiple Kentucky bluegrass types and category hybrid crosses, to provide a greater genetic variability. This variability improves the adaptability of the sward to environmental stresses, which are often compounded in golf and sports turf by heavy traffic and low heights of cut. DIVERSITY's blend of superior genetics allows for the expression of desired features of each cultivar, while also reducing the effect of cultivar specific weaknesses.

FORMULA*:

example:

25% Midnight Type

25% America Type

25% Compact Type

25% TX x KY Hybrid

*Ask for current formulation

SEEDS PER POUND*:

OVER 1.2 MILLION
