

Gallop

Turf Type Perennial Ryegrass

Lolium perenne

DESCRIPTION

Gallop is a new and improved turf type perennial ryegrass for use on the heavy use sports fields, as well as on the golf course and for lawn uses that demand turf quality plus disease and traffic performance. Gallop's color and texture blend well with other cool-season grasses, and Gallop's ability to tolerate a low height of cut make it an excellent companion in seed blends mixtures used for establishing professional turf as well as over-seeding both cool and warm season grasses.

APPLICATIONS

Gallop Perennial Ryegrass will perform in professional GLS ryegrass blends, and in mixtures with other cool season species including low cut Kentucky bluegrass on golf course fairways, tees, and roughs, sports turf, and lawn and landscape applications.

GEOGRAPHICAL ADAPTATION

Adapted to the cool season zone and transition zone as well as irrigated arid regions. Gallop is also well suited for over-seeding of bermudagrass in warm season regions.

SEEDS PER POUND

~250,000

2009-10 DATA. TEST SITES: TS1 = Texas, TS2 = Oregon

FEATURES & BENEFITS

- Ideal in areas where fast establishment and wear tolerance are key issues
- Very good traffic tolerance
- Excellent year-round turf density Excellent turf quality
- Improved Disease Resistance

PRODUCTION AREAS

Oregon, Upper Midwest

RATE*

Overseeding (warm season) 15+ lbs./1,000 ft².

Overseeding (cool season) 5-7 lbs./1,000 ft².

New Seeding (cool season) 8-10 lbs./1,000 ft².

*local conditions vary and dictate rates
