

SALINAS

Perennial Ryegrass

DESCRIPTION

Salinas has a dark green color, a very fine blade width and excellent turf performance with good salt tolerance. Its salt tolerance lends itself to fall overseeding programs in the desert Southwest and other areas affected by salinity. With quick establishment, it provides a beautiful, wear-tolerant playing surface with a smooth spring transition.

APPLICATIONS

Sports, Golf and Landscape Turf

AREA OF ADAPTATION

Cool-season and transition zone as well as dormant turf overseeding in the warm-season zone.

FEATURES & BENEFITS

Wear Tolerant, Low Mow Tolerant, Salt Tolerant

SEEDS PER POUND (APPROXIMATE)

250,000

SEEDING RATE (POUNDS/ACRE)

200-700
